Rancho Cordova, CA 95670-6114

**RE: Modification of Due Date for MRP Report Component 20**

Dear Ms. Creedon:

Beginning in December the Sacramento Valley Water Quality Coalition (Coalition) Subwatershed Groups started sending Farm Evaluation and Wetland Management templates to more than 8500 members enrolled in the Coalition. We estimate this will generate more than 17,000 completed farm evaluation and managed wetlands templates that need to be correlated and reported to the Central Valley Regional Water Quality Control Board.

Given the volume of information the Coalition will be processing and the importance of the information to various elements of the Waste Discharge Requirements (WDR) Order for the Sacramento Valley (Order), the Coalition is respectfully requesting an extension of time to submit **Report Component No. 20 – Summary of Management Practice Information** for the first Annual Monitoring Report (AMR). The Sacramento River Watershed MRP Order No. R5-2014-0030 establishes May 1, 2015 as the due date for the first AMR. The Coalition is requesting a 90 day extension to submit Report Component 20 of the Annual Monitoring Report, which would be August 1, 2015.

Please let us know at the earliest convenience if this deadline is acceptable. If you have questions contact me or Bruce Houdesheldt.

Sincerely,

David J. Guy  
President  
Northern California Water Association
